Integration with Other Drones

Sensors, onboard computers and software can be configured as payloads and integrated on any commercial drone, equipping third-party UAS with Mine, IED and UXO detection and neutralization capabilities.

GROUND DETECTION PAYLOAD

Integrable with any UAS with a 2.5 kg payload capacity.
The system installs directly with no connections and no external power supply

UNDERGROUND DETECTION PAYLOAD

Integrable with any UAS with a 4 kg payload capacity.
The system installs directly with no connections and no external power supply

NEUTRALIZATION PAYLOAD

Integrable with any UAS with a 12 kg payload capacity.
The system installs directly with no connections and no external power supply
